Flexible Income

Miller/Howard believes that financially strong stocks with rising dividends offer prospects of consistent performance over time as well as potential added value. By focusing on dividend growth, the Fund may help investors meet their income needs today and in the future by:

- Selecting companies with a consistent track record of increasing their dividends.
- In normal markets, seeking to invest at least 80% of its net assets in income producing equity securities
- The fund may invest up to 20% in securities denominated in non-US Dollar, and may invest up to 25% in MLPs.

Past performance is no guarantee of future returns

This chart plots the average annual total returns and standard deviation, from 01/31/1972 through 09/30/2012, of S&P 500 component stocks based on their dividend policies. The stocks were grouped into three indices and compared to the returns of the full S&P 500 Index: 1. Dividend Growers, those stocks that either initiated or raised their dividend in the previous 12 months. Once an increase occurs, it remains classified as a grower for 12 months or until another change in dividend policy. 2. Dividend-Payers, those companies that paid a dividend in the previous 12 months and 3. Non-Dividend-Payers, which paid no dividends in the previous 12 months. The index returns are calculated using monthly equal-weighted geometric averages of the total returns of all dividend-paying (or non-paying) stocks.

Investors should consider the investment objective and policies, risk considerations, charges and ongoing expenses of an investment carefully before investing. Standardized Yield as of 3/31/2013

A Share: 2.43 %

This yield reflects the theoretical income that a portfolio would generate including dividends and interest, during the period after deducting a fund's expenses. A fund's actual net earnings for a given period under generally accepted accounting principals may differ from this standardized yield.

There is a contractual/voluntary fee waiver currently in place for this Fund through February 1, 2022, had that subsidy not been in place the Fund's standardized yields would have been 1.98%..

Glossary

Number of Holdings: The total number of individual equities held by the Fund, or covered in the index.

Price/Earnings Ratio: A valuation ratio of a company's current share price compared to its pershare earnings over the previous four quarters.

Average Market Capitalization:

The average of market capitalization (market price multiplied by the number of shares outstanding) of the stocks.

Data presented reflects past performance, which is no guarantee of future results. Investment results and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Due to market volatility, current performance may be higher or lower than the performance shown. Call 877.287.9646 or access our website at destracapital.com for performance current to the most recent month end. Performance shown for Class A Shares with load includes the Fund's maximum sales charge of 5.75%. Returns for period of less than one year are not annualized, and include reinvestment of all distributions.

The Adviser has agreed to cap expenses such that the total annual fund operating expenses, excluding brokerage commissions and other trading expenses, taxes, acquired fund fees and other extraordinary expenses (such as litigation and other expenses not incurred in the ordinary course of business) at 1.60% for Class A, 2.35% for Class C and 1.32% for Class I. This waiver will continue in effect until February 1, 2022. The waiver may be terminated or modified prior to February 1, 2022 only with the approval of the Board of Trustees of the Trust. The gross expenses for the Class A, Class C and Class I shares are 3.96%, 6.68% and 6.28% respectively. Class A shares have a 12b-1 fee of .25%

What are the risks? While stocks have historically outperformed other asset classes over the long term, they tend to fluctuate dramatically over the short term as a result of factors affecting individual companies, industries or the securities market as a whole.

Other risks of the Fund include: **Dividend Income Risk:** Since companies are not required to continue to pay dividends, the possibility that some could reduce or eliminate their dividends in the future could adversely affect the Fund's distributions. **Foreign Investment Risk:** Foreign companies or U.S. companies with significant foreign operations may be subject to risks in addition to those of companies that principally operate in the United States **including currency fluctuations affecting securities denominated in foreign currencies**, which may affect the Fund's net asset value, the value of dividends and interest earned, and gains and losses realized on the sale of securities, as well as economic and political uncertainty. **Master Limited Partnership Risk:** master limited partnerships units ("MLPs") involve certain unique risks including limited control and voting rights, potential conflicts of interest between common unit holders and the general partner. In addition, if an MLP were classified as a corporation for federal income tax purposes, there would be reduction in the after-tax return to the Fund of distributions from the MLP, likely causing a reduction in the value of the Fund's shares, as well as sector concentration risk, as MLPs are typically focused in the energy, natural resources and real estate sectors of the economy. **Energy Companies Risk:** The Fund focuses on energy companies. General problems of energy companies of energy companies and and other regulatory policies of various governments and extreme weather was all international politics, terrorist attacks, reduced energy demand, the success of exploration extensive competition, generic drug sales or the loss of patent protection, product liability litication and increased government regulation. **Utilities Companies Risk:** Utilities companies are subject to the imposition

of rate caps, increased competition due to deregulation, the difficulty in obtaining an adequate return on invested capital or in financing large construction projects, the limitations on operations and increased costs and delays attributable to environmental considerations, and the capital market's ability to absorb utility debt. Financial Services Companies Risk. The companies may include banks, thrifts, brokerage firms, broker/dealers, investment banks, finance companies and companies involved in the insurance industry. Banks, thrifts and their holding companies are especially subject to the adverse effects of economic recession; government regulation; decreases in the availability of capital; volatile interest rates; portfolio concentrations in geographic markets and in commercial and residential real estate loans; and competition from new entrants in their fields of business. Derivatives Risk: The use of derivatives entail certain execution, market, liquidity, hedging and tax risks. The Fund will be subject to risks that include, among other things, the risk of default and insolvency of the obligor of such asset, the risk that the credit of the obligor or the underlying collateral will decline or the risk that the common stock of the underlying issuer will decline in value.
